

GRIPPS®

ENGINEERED FOR DROP PREVENTION

PRODUCT DIRECTORY

EDITION 10

WHO WE ARE

Since its inception, GRIPPS® has been dedicated to eliminating critical risks and saving workers' lives, through the implementation of innovative tool tethering and dropped object prevention solutions.

As the leader in tool tethering and falling object prevention, we work closely with partners across a wide range of sectors, engineering solutions that ensure their workforce safely returns home after each shift.

Designed and built for the harshest environments, offering superior safety, durability, practicality and functionality, the GRIPPS® range of products helps thousands of workers, globally, every day.

GRIPPS® has become well-known for delivering long-lasting, premium quality, innovative height safety equipment to customers worldwide. We pride ourselves in the relationships we build with our customers and always guarantee complete satisfaction and trust in the GRIPPS® range of products.

COLLABORATION

The GRIPPS® Industry Innovators program was created to enhance our relationship with customers. Made up of trusted trade professionals, this group provides invaluable input on every new product prior to its market release. Emphasising innovation, functionality, and practicality, GRIPPS® has forged partnerships within industry to develop a diverse range of long-lasting, premium quality, and innovative height safety solutions.

INNOVATION

The GRIPPS® product range undergoes continuous development - some products are entirely new engineered solutions, while others undergo updates. Whether it's a revolutionary innovation or an evolutionary improvement, our focus always begins with the customer. Through collaborative efforts, we strive to mitigate critical risks and ultimately save workers' lives.

CONQUER GRAVITY TOGETHER

Work confidently at heights, assured that your tools are securely tethered with world-leading equipment from GRIPPS®. Engineered for the most demanding environments, GRIPPS® products excel in safety, durability, and practicality. Our commitment to understanding the needs of those working at heights guarantees that our range of products is uniquely tailored to at-height tasks and can be seamlessly integrated into projects worldwide.

DROP PREVENTION IMPLEMENTATION SUPPORT

Protect Your Crew. Reduce Dropped Object Risk.

A single dropped tool at height can result in serious injury, project shutdowns, costly investigations and significant liability. **Effective dropped object prevention requires more than simply issuing equipment.** It relies on the correct application of products, workforce understanding and clear site procedures. **GRIPPS® provides tailored technical guidance and hands-on advisory support** to help you implement best-practice drop prevention across your project or facility. We work directly with safety leaders, project managers and work teams to assess risks, support product selection and embed practical procedures into everyday operations.

From risk evaluation to the on-site application of the **GRIPPS® CATTE Methodology**, our Drop Prevention Consultants help your teams work safely, confidently and efficiently at height.

Our Implementation Support Covers:

- Developing practical dropped object prevention solutions aligned with your team's existing workflows, tools and trade-specific requirements.
- Applying the GRIPPS® CATTE Methodology across critical tool categories.
- Providing practical guidance to help workers use tethering equipment safely and effectively at height.
- Offering site-level product guidance, including product fit, tethering limits and user comfort.
- Helping mitigate life-threatening risks, project delays, regulatory liabilities and costly site investigations.

TAKE THE GUESSWORK OUT OF TOOL TETHERING

Contact GRIPPS® today to arrange an implementation consultation with our Drop Prevention Consultants.

ELEVATE YOUR WORKPLACE SAFETY WITH GRIPPS® RESOURCES

Empower your team with the knowledge and tools they need to prevent falling objects and ensure a safer work environment. GRIPPS® offers a curated collection of training materials, including catalogues, user guides, posters, and videos, all designed to simplify and enhance your tool tethering and drop prevention strategies. With safety and practicality at the core of every resource, GRIPPS® helps you build a culture of safety that protects your workforce and boosts productivity. Visit our website to discover items such as:

- GRIPPS® Product Directory
- GRIPPS® Tool Tether User Guide
- GRIPPS® Drop Calculator
- GRIPPS® Videos
- GRIPPS® Posters
- GRIPPS® Falling Object Prevention Plans

Built with a focus on practicality and effectiveness, GRIPPS® resources are an essential component of any robust tool tethering and drop prevention strategy. Whether you're enhancing your safety protocols or educating your workforce, our expertly developed materials seamlessly integrate into your safety initiatives, helping you create a safer, more productive work environment.

CATTE: THE EFFECTIVE WAY TO STOP DROPS.

STEP 1

C

CONNECT ▶

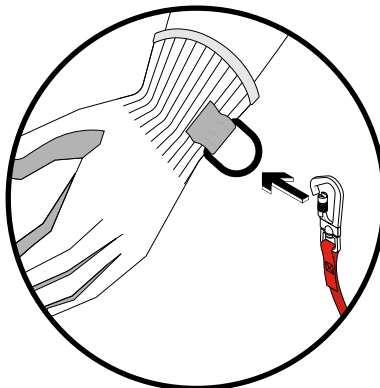

- Attach a connection point to your tool that matches the appropriate load rating and is suitable for both the task at hand and your work environment.

STEP 2

A

ANCHOR ▶

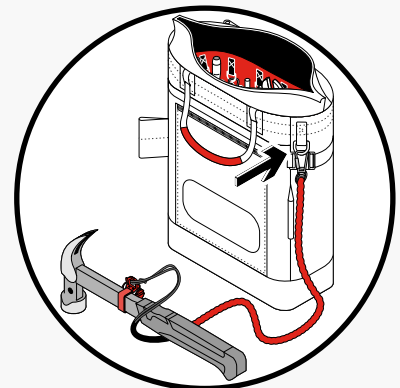

- Identify the anchor point suitable for the weight of your tool that will be securely fastened. Consider options such as a load-rated work belt, wrist anchor, or tool bag.
- Alternatively, use the structure or equipment in use, provided it offers a suitable anchor point.

STEP 3

T

TETHER ▶

- Choose a tether with an appropriate load rating, length, and suitability for the task at hand.

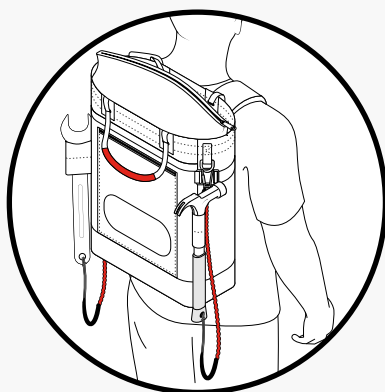

The GRIPPS® CATTE Methodology is an effective system for ensuring safe tool tethering. The acronym stands for **CONNECT, ANCHOR, TETHER, TRANSPORT, and ENCAPSULATE** providing a framework for proper implementation.

STEP 4

TRANSPORT ►

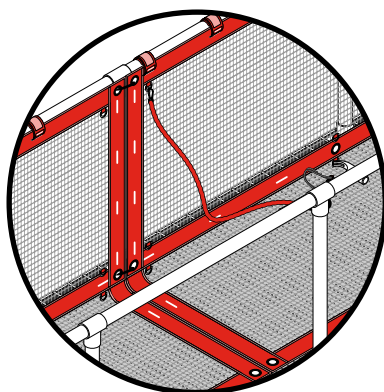

- Identify the methods for transporting your tools and equipment throughout the project.
- Keep in mind that nearly one-third of tool-related accidents happen during transportation between work areas.
- Utilising certified tool bags and pouches is important for minimising the risk of dropped tools on site.

STEP 5

ENCAPSULATE

- Encapsulation is the process of sealing off voids to prevent dropped objects and minimize safety hazards, ensuring that empty spaces do not pose risks to personnel or equipment.

It is important to not only buy the correct and safe equipment for you or your workers, but also ensure that everybody working at height comprehends the best practices for drop prevention.

The CATTE methodology, offers a straightforward approach to tool tethering that can be utilised by any worker.

CUSTOM DROP PREVENTION CRIBS/CONTAINERS

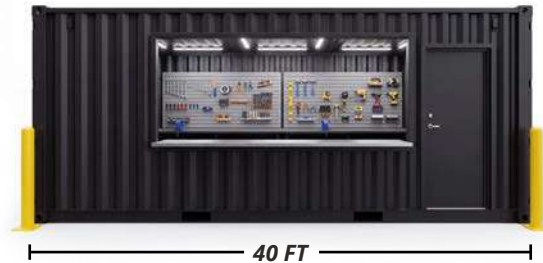

Ready to Go. Delivered to Your Worksite.

GRIPPS® Custom Drop Prevention Containers/Cribs deliver an instant, site-ready solution for storing, issuing and managing tool tethering equipment.

Every container is configured, stocked and organised before it arrives at your worksite. Simply position it, open the doors and give your workforce access to the equipment they need to secure tools at height.

Our containers can include:

- Organised shelving, racking, drawers and workbenches.
- Designated equipment issue and return areas.
- Dedicated zones for inspection, maintenance and quarantine.
- Visual signage to help workers select the right equipment.
- Custom branding and site-specific labelling.
- Storage layouts configured for your workforce, tools and operating environment.

SECURE YOUR TOOLS. STREAMLINE YOUR SITE.

Discover how a GRIPPS® Custom Drop Prevention Container can improve tool control, access and readiness on your worksite.

GRIPPS® EDUCATION WALLS & DROP PREVENTION DISPLAYS

Turn policy into practice. Educate your workforce. Reduce dropped-object risk at height.

Dropped objects remain a critical risk across work-at-height environments. **GRIPPS® CATTE Education Walls and Drop Prevention Displays are practical**, site-ready learning tools that help workers understand, select, inspect and correctly use drop prevention controls—every day, on every job.

Built around the **GRIPPS® CATTE methodology**, each display translates your site's dropped-object prevention requirements into clear, repeatable behaviours through hands-on learning and visual equipment selection.

KEY BENEFITS

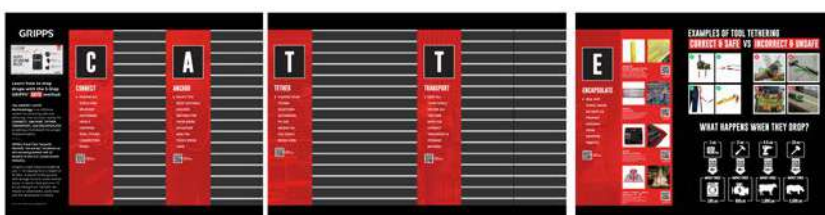

- **Critical Risk Control Assurance** Establish tangible, auditable controls that directly support your site's dropped-object prevention programs.
- **Consistency At Scale** Standardise safety practices and “how we do it here” across teams, shifts, contractors, and multiple sites.
- **Improved Workforce Competence** Provide a practical learning environment for workers to master the correct application of connections, anchors, and tethers.
- **Engagement & Culture** Create a visual focal point for effective toolbox talks, pre-starts, and leadership Walk-Arounds.
- **Reduced Uncertainty** Help workers quickly identify correct tool set-ups and recognise common failure points before they lead to an incident.
- **Custom-designed For Your Site** GRIPPS® Education Walls can be configured around your key tasks, tools, work-at-height scenarios, site standards, and available space.

MAKE DROP PREVENTION VISIBLE. MAKE IT STANDARD.

Turn site safety requirements into everyday results with a GRIPPS® Education Wall or Display.

Talk to our team about a display designed for your site.

WHAT IS ANSI/ISEA 121-2023 COMPLIANCE?

**ANSI/ISEA
121-2023
COMPLIANT**

The ANSI/ISEA 121-2023 standard outlines essential criteria for **“minimum design, performance, and labeling requirements for solutions aimed at reducing incidents involving dropped objects in industrial and occupational environments.”**

Developed by the International Safety Equipment Association (ISEA), an ANSI-accredited standards development organisation, the U.S. national standard ANSI/ISEA 121-2023 is overseen by the American National Standards Institute (ANSI), which manages standards and conformity assessment activities within the United States.

Choosing products that conform to the ANSI/ISEA 121-2023 standard enhances confidence in product performance when working at heights, compared to those lacking this standard.

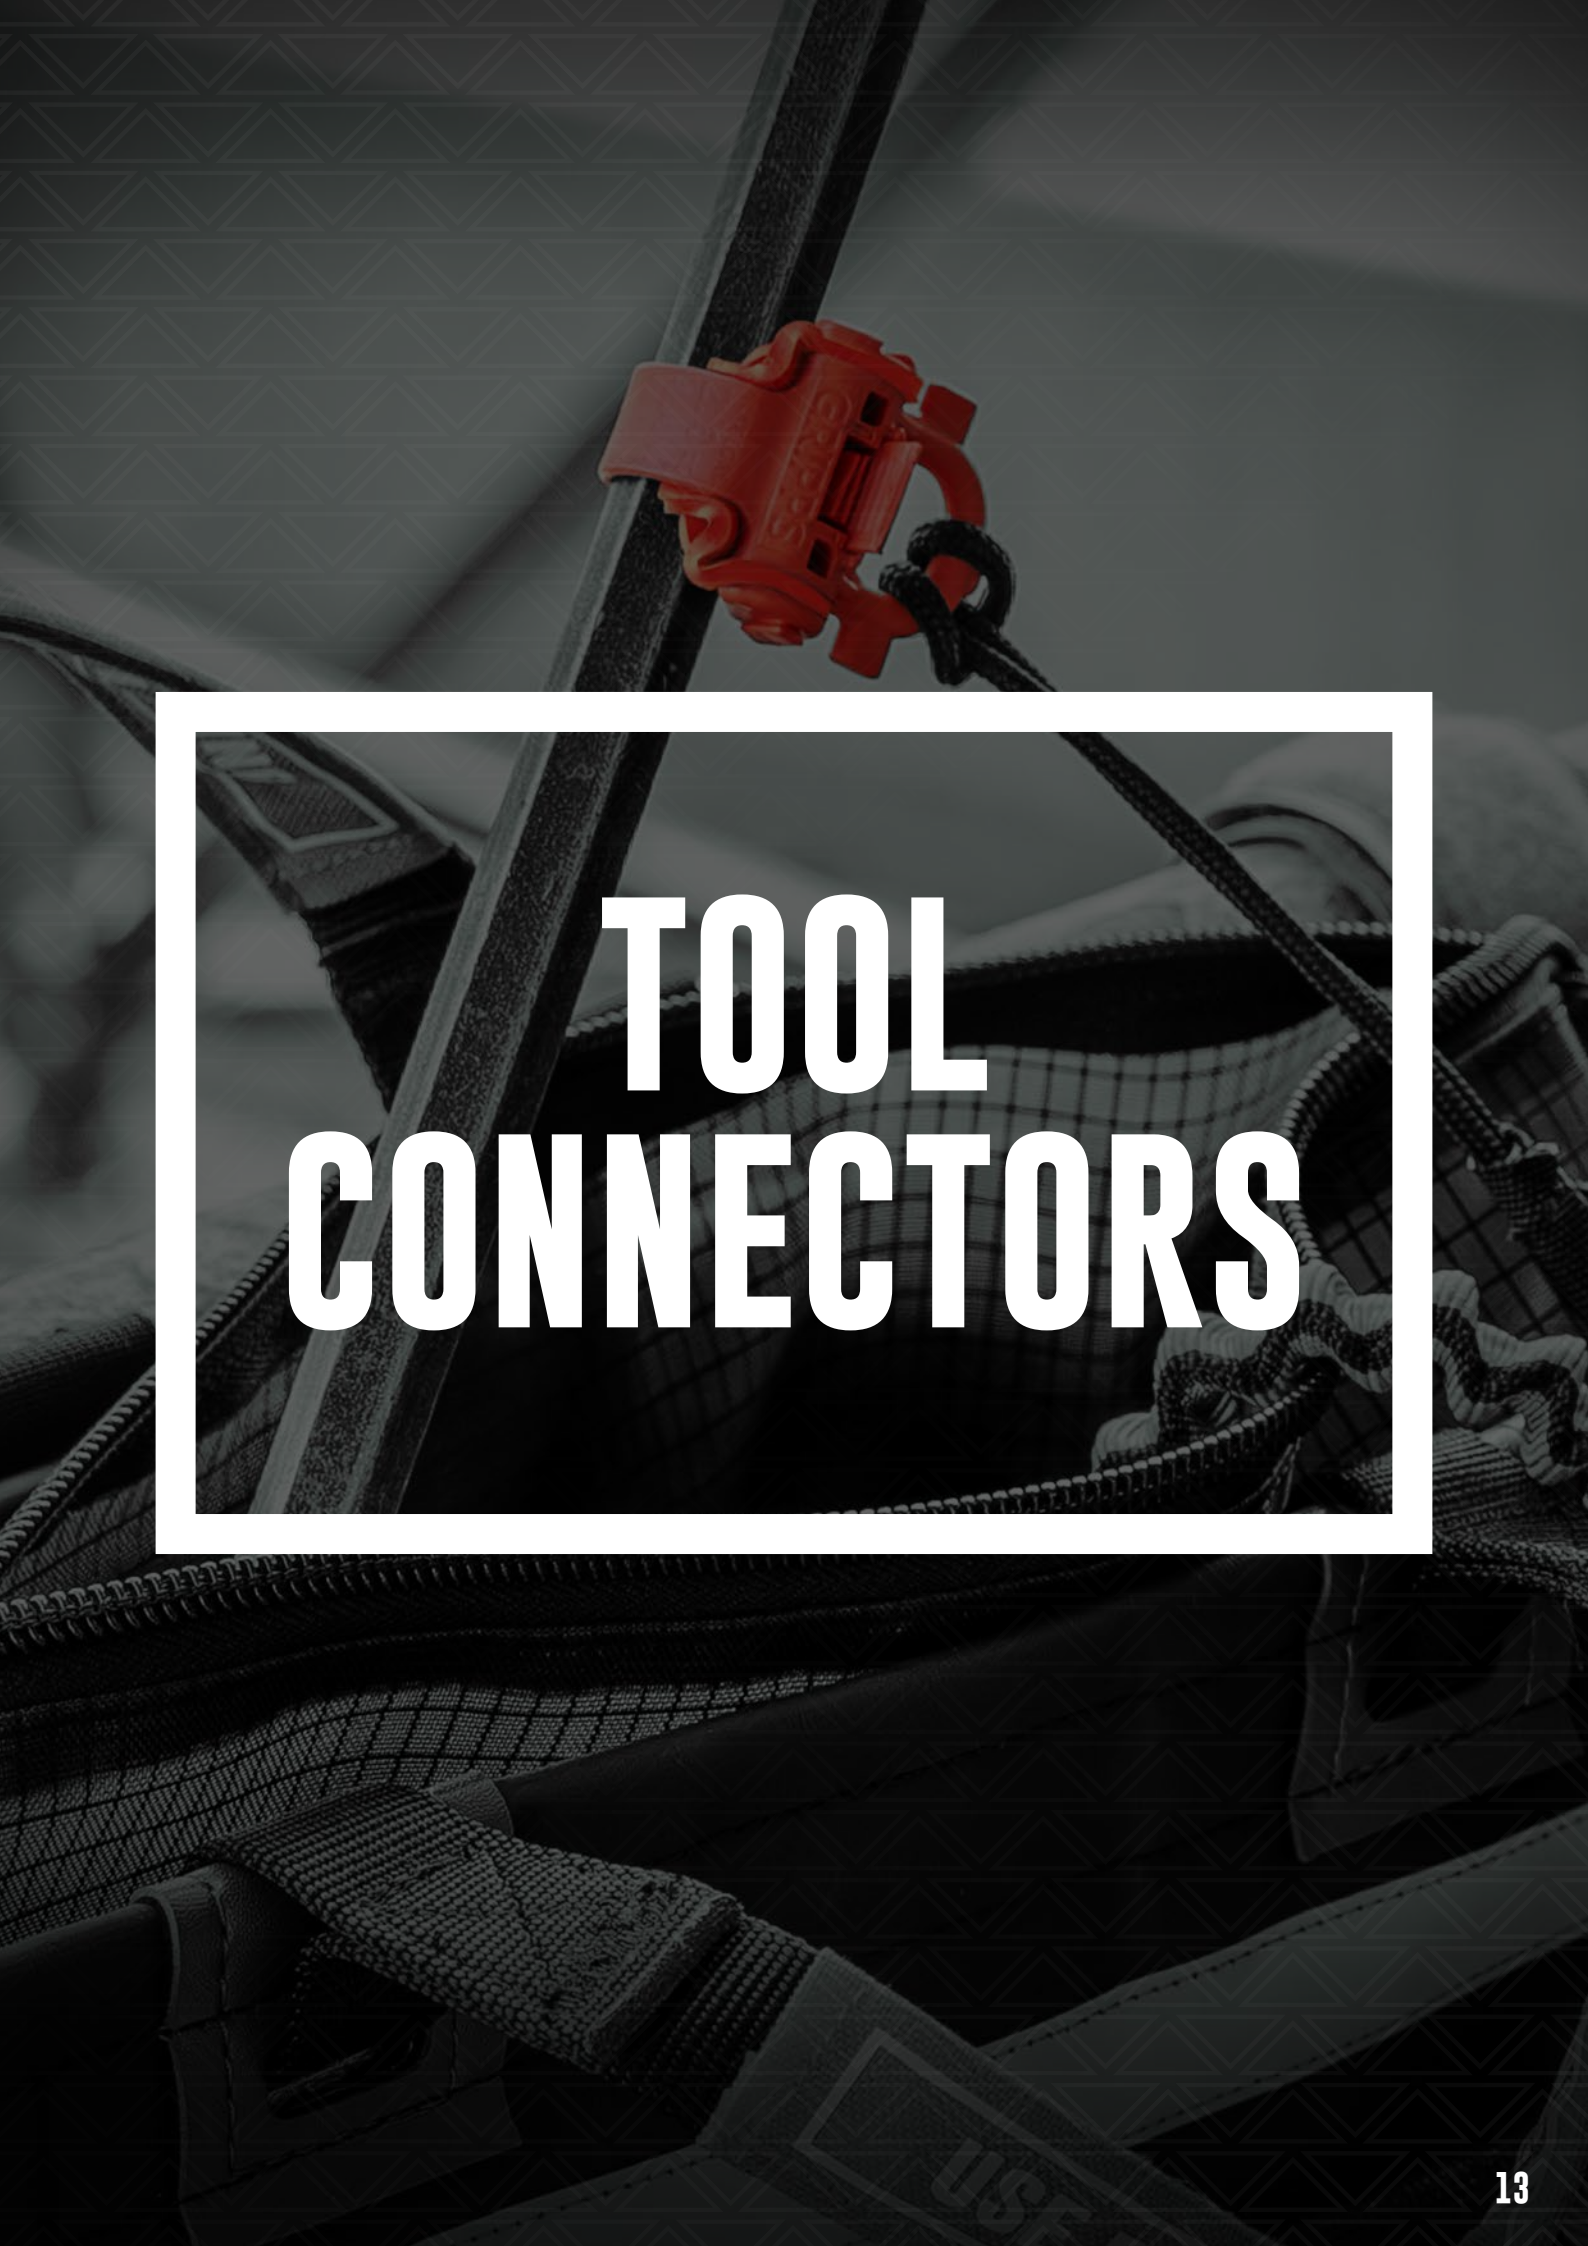

At GRIPPS® we strongly advocate selecting products that adhere to this widely recognised standard whenever feasible. We follow a rigorous testing and quality assurance/control protocol, and where applicable, ensure our products are ANSI/ISEA 121-2023 compliant.

This standard establishes minimum requirements concerning anchor attachments, tool attachments, tool tethers, and containers utilised to prevent dropped objects in the workplace.

TOOL CONNECTORS

TOOL RING

- Quick, easy installation not requiring any special tools or equipment.
- Long-lasting and economical.
- Available in three sizes.

SKU	MAX LOAD	SIZES
H01036	1 kg 2.2 lb	19 mm 0.75 in
H01037	1 kg 2.2 lb	25 mm 1 in
H01038	1 kg 2.2 lb	38 mm 1.5 in

H01036 / H01037 / H01038

GRIPLOCK CABLE MKII

- Load-rated to 2.5 kg / 5.5 lb.
- Patent pending on the Gripplock locking heads.
- PU-coated aircraft-grade steel.
- An easy installation process that can be performed onsite.

H010402-5 / H010412-5

SKU	MAX LOAD	MAX LENGTH	LENGTH
H010402	2.5 kg 5.5 lb	0.91 m 35.8 in	120 mm 4.72 in

ANSI/ISEA 121-2023 COMPLIANT

TOOL CATCH – NON CONDUCTIVE

- Robust Nylon connector with poly D-ring.
- Easy installation process that can be done onsite.
- Ideal for use with non-conductive tools.
- Fully certified and load-rated when used with GRIPPS® V-Gripp Tape.

SKU	MAX LOAD	SIZES
H01007	1 kg 2.2 lb	12 mm x 55 mm 0.5 in x 2.17 in

H01007

ANSI/ISEA 121-2023 COMPLIANT

V-GRIPP TAPE

- Self-fusing tape that provides a load-rated tool connection point when used with GRIPPS® Tool Catches and GRIPPS® Tool Hitches.
- Heat-resistant to 150°C / 302°F.
- Resistant to water and oil.
- Resilient and long-lasting.

SKU	LENGTH	WIDTH
H01010	2.7 m 106 in	60 mm 2.36 in

H01010

ANSI/ISEA 121-2023 COMPLIANT

V-GRIPP TAPE & TOOL CATCH KIT

- Creates resilient and long-lasting tool connection points.
- Applicable for a wide range of hand tools such as pliers, wrenches and spanners.
- Includes GRIPPS® unique V-Gripp Tape, which is resistant to water and oil.
- Does not require additional adhesives due to self-vulcanising V-Gripp Tape.

SKU	PART	COMPONENTS	MAX LOAD
H01417	H01005	3 x Tool Catch - 12 mm x 55 mm / 0.5 in x 2.17 in	1 kg 2.2 lb

H01417	H01010	V-Gripp Tape	

H01417

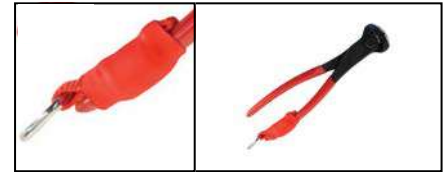

ANSI/ISEA 121-2023 COMPLIANT

GRIPP SHRINK

- Provides additional protection for GRIPPS® V-Gripp Tape.
- Quickly shrinks and protects when exposed to heat.
- Resistant to abrasives.

SKU	SIZES
H03000	20 mm x 50 mm 0.78 in x 2 in
H03001	25 mm x 50 mm 0.98 in x 2 in
H03002	40 mm x 50 mm 1.57 in x 2 in
H03005	50 mm x 50 mm 1.97 in x 2 in

H03000 - H03005

SWIVEL CATCH

- Connects to tools with an existing hang-hole or slot or closed handle.
- The steel connector ring includes a swivel point, providing a full 360-degree range of movement.

SKU	MAX LOAD	LENGTH
H01021	2.5 kg 5.5 lb	13 cm 5 in

H01021

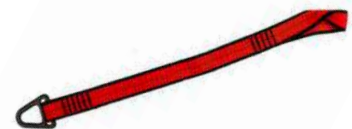

ANSI/ISEA 121-2023 COMPLIANT

TOOL HITCH - 16 KG / 35 LB

- Fast and simple application to tools with an enclosed area.
- Chokes around the enclosed handle of tools weighing up to 16 kg / 35 lb.
- No need for additional adhesives or equipment.
- Tactical-grade nylon for maximum strength.

SKU	MAX LOAD	LENGTH	MAX TETHER LENGTH
H01055	16 kg 35 lb	26 cm 10.24 in	1.8 m 71 in

H01055

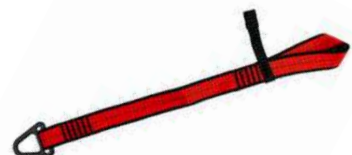

ANSI/ISEA 121-2023 COMPLIANT

SINGLE-ARM TOOL HITCH - 16 KG / 35 LB

- Ideally suited to power tools with a trigger on the handle.
- Chokes around the handle of larger tools weighing up to 16 kg / 35 lb.
- GRIPPS® V-Gripp Tape is used to secure the 'single-arm' in a way that does not interfere with the tool trigger.
- Tactical-grade Nylon for maximum strength.

SNAPLOCK

H01150-S / H01151-M / H01152-L / H01153-XL

The GRIPPS® SnapLock is an ANSI/ISEA 121-2023 compliant, self-closing tool connector that provides a secure, standardised connection point for tethering compatible tools up to 6.8 kg / 15 lb at height. Its self-closing design enables rapid setup for efficient tool tethering. Available in four sizes.

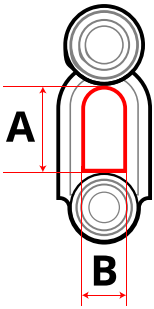

Engineered for speed and efficiency, SnapLock features a self-closing design that allows fast installation to a tool's handle or neck, enabling quick deployment or tool changeovers. Manufactured from robust aluminium alloy, it provides a strong, lightweight connector that withstands demanding industrial conditions.

- ANSI/ISEA 121-2023 compliant.
- Spring-activated self-closing design
- High maximum load capacity – 6.8 kg / 15 lb.
- No tape/adhesive or special tools required.
- High-strength, industrial construction.

Available in four sizes.

SKU	MAX LOAD	MAX TETHER LENGTH	COLOR	INTERNAL HEIGHT (A)	INTERNAL HEIGHT (B)

MAX LOAD

GRIPPTIE

H01008

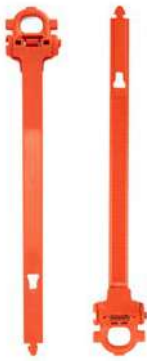

The GRIPPS® GrippTie is a versatile, durable, and cost-effective tool connector that presents a breakthrough in tool tethering technology. The GrippTie is fully certified to ANSI/ISEA 121-2023 and can be attached to a vast array of hand tools rapidly and without the need for any secondary components or specialised equipment.

Purpose-built for speed and efficiency, it dramatically cuts down application time compared to traditional methods, making tool tethering faster and more convenient than ever.

- Highly versatile and adaptable to a wide range of tools.
- Extremely fast to apply (only requiring a pair of pliers).
- Maximum load rating of 2 kg / 4.4 lb
- ANSI/ISEA 121-2023 compliant.

The GrippTie is designed for use with GRIPPS® tethers up to 1.3 m / 51 in.

GRIPPTIE TOOL

H09020

A substitute for generic pliers, the GRIPPS® GrippTie Tool is a purpose-built, custom-engineered accessory designed to make applying and tightening GrippTies faster and easier.

It delivers controlled torque, comfortable ergonomics, and repeatable results that reduce install time. Constructed from zinc-plated steel for durability and corrosion resistance, it withstands harsh site conditions.

- Engineered for GrippTie: A purpose-built design, specifically for applying and tightening GrippTies.
- Controlled tightening: Provides better leverage for controlled torque, ensuring reliable installs and reduced variability.
- Zinc-plated steel construction: Durable, corrosion-resistant build for demanding industrial environments.

TRANSPORT & STORAGE

MULE BAG - 80 KG / 176 LB

H01140

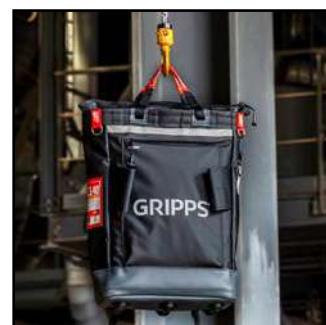

The flagship of the GRIPPS® lifting bag range, the GRIPPS® Mule Bag provides a broad range of transportation and worksite mounting options. The tough design, with multiple reinforcement points, makes it one of the strongest lifting bags on the global market, purpose-built to operate and last in the harshest of workplace environments.

- Width compatible with standard ladder cages.
- Reinforced backpack straps, EWP mounting straps and load-rated lifting points.
- Strong composite insert in the base of the bag protects against punctures.
- Armoured insert for protection when wearing as a backpack.
- Load-rated heavy-tool sleeves on both sides of the bag.
- Tether points inside and outside the bag for multiple tethering options.
- Multiple compartments inside the bag for tool storage and organisation.
- Dry document storage pocket.
- Unique serial number for product identification.
- Business card holder.

ANSI/ISEA 121-2023 COMPLIANT

MULE TOOL BACKPACK - 20 KG / 44 LB

H01141

The compact GRIPPS® Mule Tool Backpack features a dedicated 15" laptop pocket and 15 internal pockets to keep tools, technology and essentials securely organised. Built for technicians working at height, it can be worn as a backpack, used as a lifting bag, or secured to handrails with the included load-rated mounting straps.

- 15" Laptop Pocket (Pocket size 250 mm x 350 mm/ 9.8 in x 13.8 in)
- 15x internal storage pockets for excellent tool organisation.
- Lightweight, durable and robust design.
- Made from water-resistant 1000D tarpaulin.
- Waterproof zipper with two sliders complete with large T-handle pulls.
- Load-rated mounting straps for attaching to rails and scaffolding.
- New internal pocket layout for tool organisation.
- Multiple internal and external load-rated anchor points.
- Unique serial number for product identification.

BISON BAG - 45 KG / 99 LB

H01115

Packed with features, the GRIPPS® Bison Bag offers a holistic solution for the organisation, transport, and tethering of tools when working at heights. Tether anchors located both inside and outside the bag ensure tools remain secure and readily accessible. A zip closure with locking mechanism to hold the zip sliders in place, effectively safeguards contents from spills and accidental drops. Constructed from heavy-duty 26oz. canvas, providing resilience against punctures.

- Zip closure with locking mechanism protects against accidental opening of bag.
- Multiple inner pockets for comprehensive tool organisation.
- Multiple internal and external tether anchors.
- Heavy-duty webbing for long-lasting survival in the harshest of construction environments.
- Puncture-proof composite insert in the bucket base.
- Unique serial number for product identification.

BULL BAG - 113 KG / 249 LB

H01110

Arguably the most robust lifting bag in the world, the GRIPPS® Bull Bag stands out with its reinforced design. Enhancing usability, the bag features a translucent Nylon TPU-coated top closure, complete with a secure zip with an auto-locking zip slider, allowing ample light to illuminate the contents within its vibrant red interior. The GRIPPS® Bull Bag boasts load-rated reinforced lifting straps, several built-in tether anchor points and a load-rated aluminium carabiner for securing the bag when working at height.

- Secure zip closure with auto-locking T-handle zip slider.
- Heavy-duty dual layer UV stabilised 2000 denier poly PVC with red interior.
- Integrated tether anchor points inside the bucket enable tools to be securely tethered to the interior of each bag.
- Reinforced rim around the bag opening ensures protection against potential damage.
- Dual-action aluminium carabiner for securing the bag when using it at height.
- Rubber feet not only shield the bag's base but also provide stabilisation on hard surfaces.
- Unique serial number for product identification.

GRIPPS® TETHERING STATION - 20T - 1 KG / 2.2 LB

H01147

The GRIPPS® Tethering Station, known as the GTS-20T, is a versatile mobile workstation designed for various environments. Crafted from an exceptionally durable 26oz. canvas, the station minimises the use of metals and features non-conductive tether anchors.

For tasks performed at elevated heights, secure the GRIPPS® Tethering Station to scaffold tubes, handrails, or elevated working platform (EWP) cages using the load-rated and resilient straps. Reinforced eyelets enable flexible hanging with hooks or securing with rope, accommodating a wide range of environments.

- Organises and tethers up to 20 tools.
- Mounting straps are compatible with EWP cages, scaffold tubing, and handrails.
- Reinforced stiff backing creates a stable workstation.
- Extra heavy-duty 26oz. canvas.
- Perimeter eyelets for adding extra security when suspended.

ENCAPSULATION & MATTING

GAP WRAP

H06010 - H06012

The GRIPPS® Gap Wrap is a unique encapsulation device that prevents objects from being dropped accidentally within worksite voids. The mesh of the GRIPPS® Gap Wrap encases pipes from 2" to 36" in diameter and uses heavy-duty Velcro strips to tighten the opening to tubes. Enhanced security can be attained by weaving ties through the numerous stainless-steel eyelets. The Gap Wrap includes a coated Poly PVC mesh, a feature also present in GRIPPS® Gap Mats.

These innovative safety devices feature a robust design with a vibrant red PVC edge binding, providing both strength and a clear visual warning for onsite workers. Easily fasten GRIPPS® Gap Wrap to flooring using screws or zip ties through the conveniently placed corner eyelets.

- Constructed from fire-retardant material.
- Red PVC edge binding for strength and visual warning.
- Coated Poly PVC meshing (as used in GRIPPS® Fire-retardant (FR) Dropped Object Prevention Mat).

PATENT PENDING

GAP MAT

The GRIPPS® Gap Mat stands out as a robust and fire-retardant drop-prevention solution equipped with dedicated anchor points for tethering. Featuring six D-rings spread across the mat, users can effortlessly secure tools or equipment. To ensure a secure fit on grid mesh, the GRIPPS® Gap Mat can be easily fastened using cable ties (or similar ties), using its 22 strategically positioned eyelets around the edges.

This innovative mat allows workers to work on grid mesh platforms, providing protection against tools and equipment slipping through the grating. Thanks to its highly durable mesh, the GRIPPS® Gap Mat is reusable, offering long-lasting performance.

- Re-use from job-to-job.
- Constructed from fire-retardant material.
- Dual-purpose.
- High visibility.
- Custom sizing only.

GAP GUARD

The GRIPPS® Gap Guard is an exceptional modular solution for preventing drops around handrails and grid mesh flooring. Highly flexible, durable, and reusable, these mats provide workers with a rapid solution to safeguarding work areas from drops. The GRIPPS® Gap Guard boasts a modular design with Velcro edging, which enables the seamless attachment of multiple mats end-to-end along handrails or in grid formations, effectively covering expansive flooring areas. With six 2.5 kg load-rated D-rings and fire-retardant material, these mats are a sound solution for workers at heights in industrial surroundings.

- Anchor points load-rated to 2.5 kg (ensure the mat is attached securely).
- Constructed from fire-retardant material, as seen in the GRIPPS® Gap Wrap range.
- Robust hard-wearing GRIPPS® matting material.
- Modular design with Velcro edging allows the mats to be attached together end-to-end along a handrail or in a grid formation, covering a large area of flooring.
- Mountable on webbing strap too.

ENCAPSULATION & MATTING

GRIPPGRID – FR GRID MESH MATTING

GrippGrid is a robust and reusable matting solution specifically designed to mitigate the risk of dropped or falling objects by securely enclosing grid mesh platforms.

Tailored for all elevated tasks performed on grid mesh platforms, GrippGrid offers an economical drop matting alternative that can be used multiple times.

In contrast to expensive and environmentally harmful disposable items such as shade cloths, GrippGrid matting stands out as a sustainable choice, providing long-lasting use without compromising on performance. GrippGrid matting is both fire-retardant and reusable, making it the only choice for projects involving grid mesh platforms.

GRIPPMAX 750 GSM – FR GRID MESH MATTING

This matting is crafted from high-quality polyester with a durable PVC coating, ensuring both fire retardancy (BS 7837 certified) and high UV resistance. Its anti-slip surface is suitable for high-traffic areas, making it ideal for repeated use across multiple job sites.

Grippmax is easy to install, compact when rolled, and can be fastened securely with GrippClips or zip ties. Available in three sizes, it offers a flexible, economical, and compliant solution for elevated work environments.

- Engineered for all grid mesh platforms, providing comprehensive protection for work at height.
- Fire-Rated - Certified to California State Fire Marshal Title 19, NFPA-701-2019 (Test Method 2), and ASTM E-84-81A Class A.
- High Visibility – Yellow finish enhances hazard awareness.
- Quick installation with GRIPPS® GrippClip (H06055-100) and MatGripp Tape (H06050).
- Superior slip resistance for enhanced worker safety.

ENCAPSULATION FOR ELEVATED WORK AREAS.

Steel Grating / Grid Mesh Drop Prevention Solution

GRIPPS® GrippGrid is a highly durable and reusable encapsulation solution designed to mitigate the risk of dropped objects on steel grating platforms. It is exceptionally long-lasting, suitable for high-traffic areas and highly resistant to wear and tear. Easy-to-install, this matting offers reliable protection, and a long service life for multiple projects.

DURABLE, RE-USABLE, AND FIRE-RESISTANT

Engineered For Durability

Withstands heavy use and extreme conditions.

Self-Draining Mesh Design

Eliminate concerns about liquid build-up and airflow requirements.

High Visibility

Vivid yellow finish enhances walkway visibility and tool contrast.

Reusable Design

Provides a cost-effective and sustainable matting solution.

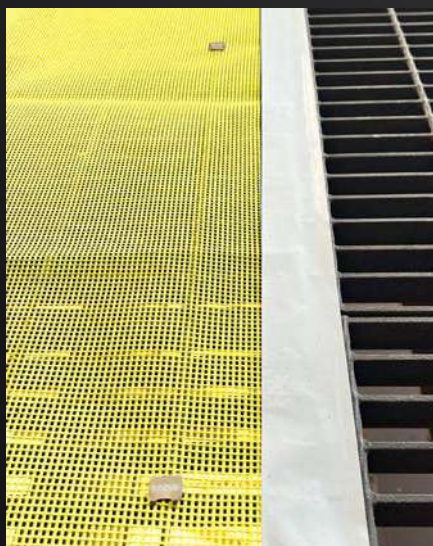

Fire-Rated

Certified to multiple standards for reliable flame protection.

Superior Slip Resistance

Improves worker safety by reducing slip risks with reliable grip performance.

MATGRIPP TAPE

H06050

MatGripp Tape facilitates the seamless connection of individual matting rolls, eliminating potential trip hazards. It offers the flexibility to customise matting for intricate areas that may require cutting to precise dimensions. Unlike other tapes, MatGripp Tape adheres exceptionally well to matting due to its specialised Butyl rubber composition.

- Strong adhesion and durability.
- Indoor and outdoor suitability.
- Compatible with GrippGrid Matting and the GrippClip.

SKU	LENGTH	WIDTH
H06050	5 m 16.4 ft	50 mm 2 in

GRIPPCLIP

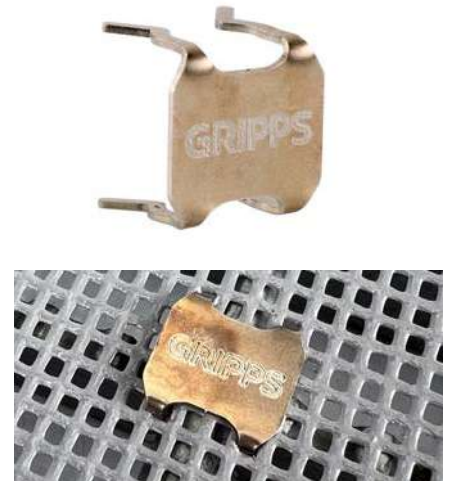

H06055

The innovative GrippClip, manufactured from stainless steel, is the quickest and most effective method of fixing down matting to steel grate flooring.

By simply pushing the GrippClip through the holes in the matting, and clipping it to the cross rods below, matting and encapsulation products will be secured. To remove, simply pull the matting or encapsulation product straight up, or insert a flat screwdriver under the GrippClip to lift it up.

- Speeds up the process of applying matting and encapsulation products.
- Attaches GrippGrid matting to the "cross rods" of steel grating floors.
- Made of stainless steel.

SKU	DIMENSIONS	QTY

MODULAR DROP MAT

H01307

The GRIPPS® Modular Drop Mat is crafted from robust, self-extinguishing canvas, providing a secure personal workspace for tasks carried out on grid mesh or steel grate flooring.

Grid mesh and steel grate flooring pose significant risks for dropped object incidents. The GRIPPS® Modular Drop Mat effectively addresses this concern by enabling workers to perform various tasks without the worry of small objects slipping through the mesh.

Strategically placed, load-rated tether anchor points enable workers to tether tools weighing up to 3 kg / 6.6 lb to the mat. Velcro knee pads enhance practicality and comfort, and they can be easily repositioned and reattached to the drop mat, adapting to diverse work environments.

The raised edges of the mat prevent tools and objects from rolling off, and a reinforced zipper along each side facilitates the connection of multiple GRIPPS® Modular Drop Mats for expanded coverage.

- Heavy-duty 26oz. self-extinguishing canvas.
- Movable Velcro kneeling pads.
- Eight load-rated D-rings for tethering tools.
- Zips on each side allow you to attach an unlimited number of Drop Mats to each other.
- Folds up and attaches directly to the GRIPPS® Mule Bag through purpose-made carabiners.

RAIL WRAP

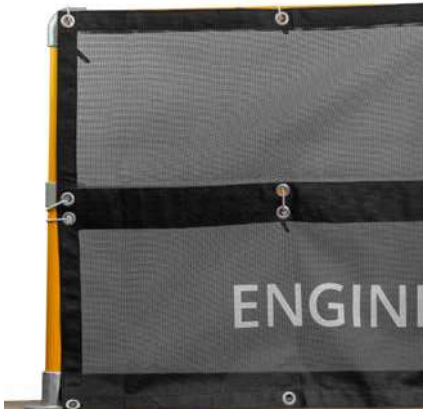

H06038-1 / H06038-1.5 / H06038-1.9

Engineered for high-performance dropped-object prevention, the GRIPPS® Rail Wrap is a flexible, reusable barrier that deploys rapidly on handrails and live edges.

Constructed from heavy-duty 450 GSM PVC-coated polyester mesh reinforced with webbing, it offers a more robust, durable alternative to traditional shade cloth while remaining cost-effective compared to rigid barrier systems. With a fire rating to AS 1530.2-1993, this low-flammability solution is purpose-built for the demands of industrial worksites.

- Reusable & Portable: Fully reusable across multiple projects, the flexible design allows for compact storage and easy transport between sites.
- Industrial-Grade Durability: Built from 450 GSM PVC-coated polyester (1000D) reinforced with webbing to withstand harsh site conditions.
- Fire-rated / Low Flammability: Compliant with AS 1530.2-1993 standards with a Flammability Index of 1, making it suitable for many regulated work zones.

GRIPPS® "STOP THE DROPS" CAMPAIGN PACK

Globally, dropped objects persist as a significant issue and pose a critical risk to workers in industrial worksites. In response, GRIPPS® developed the “Stop The Drops Campaign Pack” to enhance safety awareness, focusing specifically on tool tethering and dropped object prevention.

This comprehensive campaign kit offers a variety of resources to facilitate the implementation of an effective safety campaign within worksites. It includes posters, 20 insulated water bottle/spray can holsters (ideal for incentives), as well as pens and checklists for workers.

Moreover, the pack contains informative tool tethering introductory induction videos, suitable for showcasing to all employees. These videos cover essential topics such as:

- Risk awareness.
- ANSI/ISEA 121-2023 Standard.
- GRIPPS® CATTE Methodology.
- Best practices of tool tethering.
- Tool tethering legislation.
